- **14:15 Health measures / Movement and mobility** with Henry **and Protein snacks** with nutritionist Lizzie Jacobs

Health measurements. Available all day:

Body Composition Analysis with GB International Sprinter and Sports Scientist, Aidan Syers - 20 seconds standing on a simple scale provides you with detailed breakdown of lean muscle, body fat, bone mass and many other measures - discover what your metabolic age is and how hydrated you are. Enabling you to more accurately and effectively plan your dietary and exercise requirements - saving time, money and avoiding disappointment from diet/exercise programmes that don't support your goals. *If you took part in previous health events you will be able to compare your results.*

Blood Pressure check with Steve Lowe - probably the most important simple test you can have. High Blood Pressure normally has no symptoms ... one reason why it is known as the 'Silent Killer'. If you KNOW about it, you can DO something about it!

Grip Strength Test with Physiotherapist Janet Lowe - this reflects your overall body strength, and may also indicate a future possible risk of heart attack and stroke. Do you need to increase your strength to improve your chance of a healthy old age?

Please feel free to talk to any of the presenters at any time - they are available to help you plan your health and wellbeing. Please also note that the information provided on the day is for educational purposes and is not a substitute for the medical advice you receive from your GP or other medical professionals. If you are in any doubt about your health you should always make an appointment to consult your GP.
